WatchCraft Privacy Policy

Effective Date: October 10, 2026

Last Updated: October 10, 2026

1. Introduction

Welcome to WatchCraft ("we," "our," or "us").

WatchCraft is an interactive watch-party platform that allows users to create and join virtual rooms, watch YouTube videos together, communicate through chat, and interact with other participants in a shared 3D environment.

This Privacy Policy explains what information we collect, how we use and share it, how long we retain it, and the choices available to you when you use WatchCraft.

By using WatchCraft, you acknowledge that you have read this Privacy Policy. Where consent is required by applicable law, we will request it appropriately.

2. Information We Collect

We collect or process only the information reasonably needed to operate, secure and improve WatchCraft.

A. Information You Provide

Depending on the features you use, this may include:

- **Display name:** The name or username you choose to display to other participants.
- **Room information:** Room names, selected genres, visibility settings and room codes.
- **Chat messages:** Messages you send in a WatchCraft room.
- **Support communications:** Information you provide when contacting us for assistance or reporting a problem.
- **Account information:** Information associated with an account, if account registration or authentication is enabled.

Please do not include passwords, sensitive personal information or confidential details in public room names or chat messages.

B. Room and Playback Information

To provide synchronized watch parties, WatchCraft may process:

- Room identifiers and room membership.

- Participant identifiers, display names and assigned roles, such as Host, Moderator or Participant.
- Room join and leave events.
- The currently selected YouTube video identifier.
- Shared playback state, including play/pause status, playback position and relevant timestamps.
- Room invitations, access requests and moderation actions where supported.

This information is used to make room participation, access control and synchronized playback work correctly. The shared playback state is not intended to serve as a record of your personal viewing activity outside WatchCraft.

C. Technical Information

When you access WatchCraft, our application or hosting infrastructure may automatically process technical information such as:

- IP address and connection information.
- Browser type and version.
- Device and operating-system information made available to the service.
- Session identifiers and connection timestamps.
- Error reports, diagnostic information and security logs.

We use this information to maintain service reliability, troubleshoot problems, prevent abuse and protect the platform.

The exact information recorded may depend on the hosting provider and technical configuration used by WatchCraft.

D. Browser Storage

WatchCraft may use browser storage or similar technologies to maintain necessary session information, remember interface preferences or support application functionality.

You can manage browser storage through your browser settings. Clearing it may sign you out or reset certain preferences.

3. How We Use Your Information

WatchCraft may use information for the following purposes:

- Creating and managing watch-party rooms.
- Allowing users to join rooms through valid codes or invitation links.
- Displaying participant names, roles and connection status.

- Synchronizing video selection, playback, pausing and seeking among room participants.
- Delivering chat messages and room updates.
- Enforcing room permissions and preventing unauthorized actions.
- Displaying eligible public rooms in room discovery features.
- Maintaining application security, reliability and performance.
- Investigating technical issues, abuse reports and service errors.
- Responding to support requests.
- Meeting applicable legal obligations.

We do not use room information or chat messages for purposes unrelated to operating, protecting or supporting the service unless we have an appropriate legal basis and provide any required notice.

4. Public and Private Rooms

WatchCraft supports room-based participation.

Public rooms: Room names, genres and other information designated for public discovery may be visible to other users.

Private rooms: Private rooms are intended to be accessed through their designated invitation or room code rather than public discovery. However, anyone who obtains a valid invitation or code may be able to access the room if they satisfy its access requirements.

Participant visibility: Other people in your room may see your display name, role, messages and other information that the room interface makes available.

Please share room invitations responsibly. Do not assume that information shared within a room is confidential.

5. Chat and User-Generated Content

Messages you send in a WatchCraft room are processed so they can be delivered to other participants.

Depending on the application's configuration, chat messages may remain stored for a period after they are sent or after a room ends.

Do not use chat to share passwords, financial details, confidential information or other information you do not wish to disclose to other participants.

You are responsible for the content you submit. We may review or restrict content when reasonably necessary to address abuse, enforce room rules, protect users or comply with applicable law.

Where chat history is stored, its retention and deletion are subject to the retention practices described in this Policy.

6. YouTube and Third-Party Services

WatchCraft allows users to select and play videos using YouTube's embedded player.

WatchCraft does not host the underlying YouTube videos. Videos are provided through YouTube and remain subject to YouTube's terms, policies and availability.

When the YouTube player is loaded or used, YouTube and Google may receive information such as IP address, browser or device information, cookies or similar identifiers, and information about interactions with the embedded player. The information collected depends on the player configuration and your interaction with it.

YouTube and Google process information under their own privacy practices. WatchCraft does not control their independent data processing.

You can review their policies here:

- Google Privacy Policy
- YouTube Terms of Service
- YouTube API Services Developer Policies

WatchCraft does not intentionally bypass YouTube's standard player features or independently host copies of videos through its embedded player.

7. How We Share Information

We do not sell personal information.

We may share or make information available in the following circumstances:

With room participants: Information necessary for room participation, including your display name, role and chat messages, is visible to other participants as described in this Policy.

With service providers: Hosting, database, infrastructure and security providers may process information as needed to operate WatchCraft. Their access should be limited to their service responsibilities and subject to appropriate safeguards.

With YouTube and Google: Information is processed through the embedded YouTube player as described above.

For security or legal reasons: We may disclose information where reasonably necessary to investigate abuse, protect users or the service, respond to valid legal requests, or comply with applicable law.

With your direction or consent: We may share information when you ask us to do so or where you have provided consent where required.

We do not authorize service providers to use personal information for unrelated purposes merely because they provide services to WatchCraft.

8. Data Retention

We retain information only for as long as reasonably necessary for the purposes described in this Policy, subject to applicable legal requirements.

Retention may vary by data type:

- Active room state is retained as needed to operate the room.
- Room metadata may remain available while a room is active or otherwise retained by the application's room-lifecycle configuration.
- Chat messages may be retained according to the application's chat-history settings.
- Technical and security logs may be retained for troubleshooting, security and abuse prevention.

When information is no longer needed, we will take appropriate steps to delete or anonymize it, unless retention is required or permitted by applicable law.

The actual retention periods depend on WatchCraft's implementation and hosting configuration. Contact us using the details below to request information about or deletion of your personal data.

9. Data Security

We take reasonable technical and organizational measures designed to protect information against unauthorized access, alteration, disclosure, loss or destruction.

Depending on the relevant system, safeguards may include access controls, server-side permission checks, secure configuration, protected communications and appropriate handling of credentials.

No online service or method of electronic storage can be guaranteed to be completely secure. You should avoid sharing sensitive information through public room names, invitations or chat messages.

If we become aware of a personal-data breach, we will take appropriate steps consistent with applicable legal requirements.

10. Your Privacy Choices and Rights

Depending on your location and applicable law, you may have rights relating to your personal information, including the ability to request:

- Information about the personal data we process.
- Correction of inaccurate personal information.
- Deletion of personal information where appropriate.
- Withdrawal of consent where processing relies on consent.
- Redress for privacy-related concerns.

You may also be able to leave a room, stop sending chat messages or change information displayed in your profile where the relevant features are available.

To make a privacy request, contact **[Your privacy contact email]** using the subject line "WatchCraft Privacy Request."

Please identify the information or room concerned sufficiently for us to locate it. We may request reasonable verification before acting on a request to protect against unauthorized disclosure or deletion.

We will respond within the period required by applicable law. Certain information may need to be retained where legally required or reasonably necessary for security, dispute resolution or compliance.

11. Children's Privacy

WatchCraft is not designed to knowingly collect personal information from children in circumstances where the required parental or guardian consent has not been obtained.

Where applicable law requires parental or guardian consent for a child to use the service or for their personal information to be processed, that consent must be obtained before the relevant processing takes place.

If you believe that a child has provided personal information to WatchCraft in circumstances that require consent and that consent was not obtained, contact us so that we can review the situation and take appropriate action.

12. International Processing

WatchCraft and its service providers may process information in countries other than the country where you live, depending on the location of the hosting, database and infrastructure services used.

Where personal information is transferred internationally, we will take steps required by applicable law and use appropriate safeguards where necessary.

13. Third-Party Websites and Services

WatchCraft may contain links to third-party services, including YouTube and Google.

When you follow a third-party link or use an embedded service, your interaction may be governed by that provider's terms and privacy policy.

This Privacy Policy applies to WatchCraft's own data practices. It does not govern services independently operated by third parties.

14. Changes to This Privacy Policy

We may update this Privacy Policy as WatchCraft's features, infrastructure or legal obligations change.

When we make changes, we will update the "Last Updated" date. If a change requires additional notice or consent under applicable law, we will provide it through an appropriate method.

We encourage you to review this Policy periodically.

15. Contact Us

For privacy questions, requests to access or delete personal information, or concerns about how WatchCraft handles data, contact:

WatchCraft Privacy Contact

Operator: [Your full legal name or registered business name]
Email: [Your privacy contact email]
Website: [Your deployed WatchCraft website URL]
Location or address: [Your business or contact address, where appropriate]

We will review privacy enquiries and respond in accordance with applicable law.

This Privacy Policy describes WatchCraft's intended privacy practices. It should be updated whenever the application's actual data collection, retention, providers or

features change.
